

**Amendments to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1-20. (Canceled).

21. (New) A dermal and/or cosmetic galenic base whose aqueous phase contains at least two polyols each selected from the group comprising osides, oses and ose reduction products, characterized in that at least two of these polyols are selected from the group of ose reduction products comprising mannitol and xylitol, and in that at least one polyol is selected from the group of oses comprising glucose, rhamnose, xylose, mannose and fructose.

22. (New) The dermal and/or cosmetic galenic base as claimed in claim 21, wherein one polyol selected from the group of oses is rhamnose.

23. (New) The dermal and/or cosmetic galenic base as claimed in claim 21, wherein one polyol is selected from the group of osides comprising fructooligosaccharides, the trisaccharide polymer of  $\alpha$ -L-fucose-1->3- $\alpha$ -D-galactose-1->3- $\alpha$ -D-galacturonic acid, hyaluronic acid, chondroitin sulfate, cyclodextrins, galactoarabinan and inulin.

24. (New) A dermal and/or cosmetic galenic base as claimed in claim 21 whose fatty phase contains at least two liposoluble polyols each selected from the group comprising Rhamnosoft<sup>®</sup>, cetearyl glucoside, mannitan laurate and glucose glutamate.

25. (New) The dermal and/or cosmetic galenic base as claimed in claim 21, wherein it also contains a fatty phase comprising a substance selected from liporegulatory substances.

26. (New) The dermal and/or cosmetic galenic base as claimed in claim 25, wherein the substance selected from liporegulatory substances is a lipid extract of Laminaria ochroleuca which is rich in eicosapentaenoic acid and docosahexaenoic acid.

27. (New) The dermal and/or cosmetic galenic base as claimed in claim 25, wherein the substance selected from liporegulatory substances is soy oil.
28. (New) The dermal and/or cosmetic galenic base as claimed in claim 25, wherein the substance selected from liporegulatory substances is linseed oil.
29. (New) The dermal and/or cosmetic galenic base as claimed in claim 25, wherein the substance selected from liporegulatory substances is rapeseed oil.
30. (New) The dermal and/or cosmetic galenic base as claimed in claim 25, wherein the substance selected from liporegulatory substances is a fish oil rich in alpha-linolenic, eicosapentaenoic and docosahexaenoic acids.
31. (New) The dermal and/or cosmetic galenic base as claimed in claim 25, wherein the substance selected from liporegulatory substances is a product obtained by synthetic or biosynthetic chemistry of the mono-, di- or triglyceride type, or a phospholipid or glycolipid whose fatty acid composition is between 10 and 100% of alpha-linolenic, eicosapentaenoic and docosahexaenoic acids.
32. (New) A method of cosmetic treatment, comprising applying to skin a cosmetic composition comprising a dermal and/or cosmetic galenic base according to claim 1.
33. (New) The method as claimed in claim 32, wherein the polyol selected from the group of oses is rhamnose.
34. (New) The method as claimed in claim 32, wherein the polyol is selected from the group of osides comprising fructooligosaccharides, the trisaccharide polymer of  $\alpha$ -L-fucose-1- $\rightarrow$ 3- $\alpha$ -D-galactose-1- $\rightarrow$ 3- $\alpha$ -D-galacturonic acid, hyaluronic acid, chondroitin sulfate, cyclodextrins, galactoarabinan and inulin.
35. (New) A method of cosmetic treatment, comprising applying to skin at least two liposoluble polyols each selected from the group consisting of Rhamnosoft<sup>®</sup>, cetearyl

glucoside, mannitan laurate and glucose glutamate, in the fatty phase of a dermal and/or cosmetic galenic base.

36. (New) The dermal and/or cosmetic galenic base as claimed in claim 21, wherein the total polyol content is between 0.1 and 40% of the total weight of the aqueous phase.

37. (New) The dermal and/or cosmetic galenic base as claimed in claim 24, wherein the total content of liposoluble polyols is between 0.01 and 10% of the total weight of the fatty phase.

38. (New) The dermal and/or cosmetic galenic base as claimed in claim 24, wherein the total content of liporegulatory substances is between 0.01 and 100% of the total weight of the fatty phase.

39. (New) A cosmetic and/or dermo-cosmetic composition, comprising a base as claimed in claim 21.
